

IOSH Working Safely Training: A nationally recognised training course that teaches the essentials of health & safety

Course Outline:

Working Safely is a one-day course for staff from any sector with no supervisory or managerial responsibility. It provides a grounding in the essentials of health and safety – everyone at work should have an understanding of need to work safely.

Working Safely introduces a completely new approach to health and safety training offering all the basics in a high impact interactive package.

The Working Safely course is accredited by IOSH—the Institution for Occupational Safety & Health. The course is nationally recognised as providing good basic safety training for employees working ‘on the shop floor’.

Certification:

For delegates who attend the course and successfully complete the written and practical assessments, there is a choice of accreditation, either an IOSH Working Safely certificate or an IOSH passport card.

Course Content and Duration:

The Working Safely course lasts one day. We can offer places on open courses delivered in Railsafe Systems’ own modern Training Centre. We can also offer in-house training at your own premises.

There are five modules in the course:

- Module 1 – Introducing working safely
- Module 2 – Defining hazard and risk
- Module 3 – Identifying common hazards
- Module 4 - Improving safety performance
- Module 5 – Protecting our environment
