Personal Track Safety (PTS) E-Learning: IS35

Duration of course: 1 day

Maximum no. of candidates: 12

Course aims:

This training package is intended for candidates who wish to work on or near the line on Network Rail's infrastructure

Objectives:

Upon successful completion of the course candidates will be able to:
• Demonstrate their ability to understand and interpret the online material at their own pace and show competence to proceed to the Practical training module

Other information:

- Successful completion of the E-Learning assessment is required prior to attendance on the Practical training day
- Both the E-Learning and Practical elements must be successfully completed to obtain Personal Track Safety (PTS) competence
- The e-learning typically takes about 3.5 hours to complete; learners may take less or more time than this
- Results will be registered by Infrasafe Training for issue of a Sentinel Track Safety Card

Venue:

E-Learning suites situated within our modern training centre in Blaydon, Tyne & Wear or we can arrange training at a location to suit your needs
